

Our Family Care Program

When a patient becomes a part of our practice, we feel a responsibility and dedication to the entire family. In a continuing effort to provide quality orthodontics, we provide a comprehensive orthodontic examination to all family members at no charge. We see patients at all ages and prefer to do an initial exam at age seven when the permanent teeth are starting to erupt. Early treatment can often minimize future orthodontic problems and maximize our treatment results.

As a family care provider, we welcome family members of all ages. We encourage adult family members who have an orthodontic concern to take the opportunity to seek out options in orthodontics. We are an Invisalign Premier Provider, which may be an alternative to braces for some teen and adult cases. Many parents are happy to join their child(ren) in the process of achieving a healthy and beautiful smile.

We thank you for the opportunity to serve your family.

Our Family Care Kids Car

Siblings are special!! The ideal time for the first orthodontic examination of a child is at age 7 when the permanent teeth are starting to erupt. Early treatment can often minimize future orthodontic problems and maximize our treatment results.

Turning 7 years old is a time for celebration! This birthday marks the beginning of V.I.P. status in our KIDS CAR. Dr. Burkland and his Staff will mark this special birthday event with a card and invitation to come in for a *free* initial orthodontic exam and visit to the **KIDS CAR** treasure station.
